

Introducing the New 2N Web Interface – Get an Exclusive Early Look!

Dear Valued Customers,

We are thrilled to present our brand-new web interface for managing your 2N devices. Our goal is to provide you with a modern, intuitive, and fast environment for access control management, and this is a significant first step.

Why are we sharing it with you now?

Although our QA team has thoroughly tested the interface, we know that the most valuable feedback comes directly from you, our customers. That's why we're giving you an exclusive opportunity to try it out during its final development phase and help us refine it to perfection.

What you should know:

- **Not everything is final yet.** Some features are still being implemented in the new interface. However, you can always easily switch back to the original web interface, which remains fully accessible in this version.
- **We're continuously making improvements.** We are actively unifying the look and feel, refining component behavior, and adding missing options.
- **Your voice matters.** Our QA team is diligently reviewing all your input and actively addressing reported issues.

How can you help us?

It's simple – try out the new interface and share your thoughts with us. Let us know what you like and what we can improve. Your feedback is crucial in ensuring the final version perfectly meets your needs and expectations.

Thank you for your valuable input and for being a part of this journey with us!

Sincerely,

Petr Malík | SW Product Team Leader | malik@2n.com

Luboš Hrubý | 2N OS QA Manager | hruby@2n.com
