

# Download More Than 50MB

Because of the default settings in Microsoft Windows, you might have problems when downloading files from the 2N Media Library (mapped as a Network Drive), that exceed the download size limitation (50MB). To avoid Error Messages you can customize the Web Client in the Registry.

## Go to Registry Editor

Click Start, type regedit in the Start Search box, and then press ENTER.

STEP  
**01**

STEP  
**02**

## Locate Registry Subkey

Locate and then click the following registry subkey: HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\Services\WebClient\Parameters.

## Locate the DWORD FileSizeLimitInBytes

Locate FileSizeLimitInBytes DWORD in the right pane and double click it to open its properties.

STEP  
**03**

STEP  
**04**

## Increase the Value for Download

On the Edit menu, click Modify, and then in the Value data box increase the Value of 50000000 (in bytes) to 1500000000 (1,5GB).

## Exit & Restart

Exit registry editor and restart the Web Client Service.

STEP  
**05**
