

## AUTOMATIC DOOR OPENER ED100

Low-energy, simple and safe **automatic door strike** without the need to touch the door handle. Thanks to the option of **fully contactless** operation, it is the ideal solution for offices, hospitals, banks or retirement homes. The **strike is activated by potential-free contact**. It can be connected to a motion sensor, as well as an electronic **access control system**. In this case, it automatically opens the door to users with a valid chip, code or mobile authorization. The door strike can be installed on the right or left side of the door, while the door can open inward or outward.

ORDER NUMBER ... 11202401

### TECHNICAL PARAMETERS:

Operating voltage:	230 V
Opening speed (90°):	3-7 seconds
Operating temperature:	-20°C to +55 °C
Protection level:	IPI2D
Dimensions:	620 x 197 x 82 mm
Weight:	8,5 kg

Supplied with an arm for inward opening, a sensor and two remote controls

Adjustable opening and closing speed

Operating modes: automatic / locked / one-way / partially open / hold-open position

Safety blocking and electronic lock function

Support of multiple access control systems and a fire alarm system

Automatic reverse operation
